

SYLLABUS
IT 7333: Enterprise Cloud and Wireless Security
FALL 2023

Course Coordinator: Liang Zhao

Coordinator Email: lzhao10@kennesaw.edu

Course Learning Objectives:

1. Describe the differences between wireless security and wired security.
2. Build the working knowledge of security building blocks so that it can be applied to solve the problems of designing security solutions in wireless network systems.
3. Acquire the fundamental understanding of two main-stream approaches i.e., data-oriented and voice-oriented taken by wireless security systems.
4. Master to learn at least one of advanced wireless network security systems in depth, and enhance the skills of enabling and configuring a wireless network system.
