

SYLLABUS
IT 7913: Research Seminar in IT
FALL 2023

Course Coordinator: Liang Zhao

Coordinator Email: lzhao10@kennesaw.edu

Course Learning Objectives:

1. Define and compare major categories, techniques, and methods of doing research in information technology.
2. Demonstrate the ability to conduct systematic literature review.
3. Plan, design, and implement a significant research project in an area of information technology using major empirical methods of information technology research, such as surveys, case studies, comparative studies, and experiments.
4. Effectively and professionally present the outcomes of the research.
